SOLIS

ANDROID PILOT, VERSION 1.0

Look at your patient. SOLIS writes the note.

SOLIS listens to the visit, writes the note, and builds a clean claim, on your phone. Made for physicians and small practices without a big billing department.

1. **Scan the cards.** Insurance card, license barcode, SSN card. Photos deleted after reading.
2. **Consent.** English or Spanish script. Agree out loud or sign.
3. **Record.** Your voice told apart from the patient's.
4. **Review the note.** Concise SOAP. Nothing invented.
5. **Send the claim.** Checked, then sent as 837P in one tap.

Codes from the patient's own words

- "My feet burn at night" stays a symptom code until you confirm a diagnosis (ICD-10-CM outpatient rule IV.H). Uncertain wording waits for one tap.
- Every diagnosis links to the words it came from.
- E/M level by place of service, new or established patient, and medical decision making.
- 59 of 63 official coding rules fully enforced, each citing its guideline. The other 4 need the AMA CPT license and are not in the app.
- A Why button on every check: the rule in plain English, its official citation and the guideline text. Works offline.

Checked before the claim goes out

- Against the code sets for the date of service: `ICD-10-CM FY2026/FY2027, HCPCS Oct 2026, 2026 PFS, NCCI MUE and add-on edits, MCE v44.`
- Eligibility at check-in, claims in one tap and claim status through the Stedi clearinghouse. Export as CMS-1500 data or 837P.

Your practice decides where the audio goes

- On-device mode: no audio leaves the phone; works offline after a one-time download of about 150 MB.
- Cloud mode, only when you turn it on: the Deepgram medical model and Claude.
- Vendor keys never ship in the app. Built for HIPAA workflows. BAA available.

2 hours

of EHR and desk work for every hour of direct patient time in the clinic day.

Sinsky C, et al. Annals of Internal Medicine, 2016. doi.org/10.7326/M16-0961

5.9 of 11.4 h

of a primary care physician's weekday spent in the EHR, 1.4 h of it after clinic hours.

Arndt BG, et al. Annals of Family Medicine, 2017. doi.org/10.1370/afm.2121

60 %

of medical group leaders saw claim denials rise in early 2024 versus 2023.

MGMA Stat poll, March 5, 2024, 235 responses. mgma.com

Join the pilot.

Demo account with fictional patients, a BAA template, and test-mode claims until your payer enrollment is done. Request early access at **solis-health.pages.dev**

Planned launch pricing per clinician / month, billed annually: **Solo $129** **Practice $299**

Free during the pilot.

SOLIS is not a medical device and does not diagnose or treat; clinicians review and sign every note. No EHR, lab or pharmacy integration. Android 8+; iOS not yet released. Screens show fictional demo data. CPT is a registered trademark of the American Medical Association.
